DYNA**Write** ®

The Ultimate Conversation Piece

DynaWrite is perfect for augmented communicators with good literacy skills

DynaWrite

Quick Communication

Augmented communicators will find
that it is quick and easy to create messages of any length or complexity. Featuring VeriVox® voice technology, the DynaWrite gives augmented communicators very natural sounding speech-output. DynaVox Technologies' Voice Retention Technology® or VRT® lets augmented communicators bank up to one hour of favorite expressions or stories, etc. in natural speech that can be used on the device at a later time.

Easy to Use

Anyone familiar with a standard computer keyboard can "type and talk" within minutes of opening the box!

Peace of Mind

Developed specifically for augmented communicators, DynaWrite can absorb the impact of daily living. You can rest easy knowing that DynaCare covers your DynaWrite for one full year from the date we ship the product to you.

Spend Time on What's Important

DynaWrite's familiar interface allows augmented communicators to spend their time with those they love and doing the things they enjoy, instead of spending time learning how to use or program the device.

SPECIAL FEATURES:

Stylish, low profile design

Voice Retention Technology or VRT

VeriVox Voice Technology
