

Accessories

Rugged Case

Produced by Otterbox, our rugged case helps make Cyrano oblivious to dust, drops and water! A gasketed case seals out the elements, and a flexible membrane allows you to use the touch screen while safely stored in the case. A hard, hinged cover adds more protection when the Cyrano is not in use. Our rugged case is available trimmed in black or yellow.

23-2002B Rugged Case for Cyrano (Black)
23-2002Y Rugged Case for Cyrano (Yellow).....\$99.99

Bluetooth Foldable Keyboard

Our new typing interface works great with this external keyboard. Produced by HP, this keyboard connects to

Cyrano through a wireless Bluetooth™ connection. Simply turn on both machines, enable bluetooth, and the devices connect automatically. Type whatever you want and Cyrano will speak your message.

23-2004 HP Bluetooth Wireless Keyboard.....\$129.99

Bluetooth Wireless Headphones

Compact and easy to use, our headphones from HP provide wireless listening for music or communications. Give to your friend in a crowded restaurant or theater for totally private communication.

COMPANY

Because everyone has something to say...

Communication is such a large part of our lives that it is difficult to imagine what would happen if you were to lose your ability to speak.

The Cyrano Communicator™ provides a cost-effective, portable solution built around a six ounce Pocket PC.

Our picture based interface is great for people who are just starting out in augmented communication, or for those who have visually oriented communication needs, like autism or aphasia.

For many, text or even symbols represent barriers to acquiring an effective method of communication. Cyrano uses **pictures**, taken with an embedded camera. Now, instead of a symbol or block drawing, you can use a picture of your favorite restaurant, your favorite park, your best friend. Pictures can eliminate the need to learn a meaning for a symbol, and make the process of communicating simple and natural.

Cyrano makes a great training tool as well, since each picture block can lead to additional pages of pictures, or even play movies. Some of our clients have used Cyrano to take movies of the activities they do at work and home, and then use those movies as a reminder of how to perform the task.

Cyrano is much like a blank canvas, allowing you to create the perfect communication system that is right for **you**.

Dynamic Speech and Cyrano Shorthand™

Cyrano also includes a new typing interface we call Cyrano Shorthand™. Type in virtually anything you want, and Cyrano will speak your message in one of five different voice personalities. Our phrase box allows you to enter as many words as you wish. You can save your commonly used phrases, and even group them by topics you define.

Cyrano Shorthand™ contains an abbreviation utility that lets you type in any abbreviation you want, and then use those abbreviations (preceded by a slash) in your phrases.

For instance, typing "/tuv for your gift!" would be spoken by Cyrano as "Thank you very much for your gift!".

You can create your own abbreviations, tailored to the way you like to speak. In this way, you can use just a few abbreviations to represent virtually hundreds of words.

To enter text, you can choose one of four embedded typing methods including an on screen keyboard, letter recognizer, or even a transcriber that translates your handwriting into text.

For even greater accuracy and speed, we offer a wireless keyboard. Simply start both machines, and they connect automatically. Type whatever you want, press the ENTER key, and Cyrano will speak your phrase using your selected voice personality.

Some people want to use both our picture based and Shorthand methods of communication, so we made Cyrano so you can easily switch between the two methods.

Cyrano
Communicator™
