

# iChat<sup>3</sup>™

The science of human expression.

## Impact<sup>®</sup>

***Powerful tools for symbol-reliant augmented communicators and their care teams.***

**We have added NEW VOICES for much more natural and expressive speech! The iChat<sup>3</sup> now uses Acapela speech technologies licensed from the Acapela Group in addition to the DECTalk<sup>®</sup> speech technologies from FONIX! Improved speaker provides stronger and clearer voices than ever before!**

Augmentative and alternative communication (AAC) devices assist people with severe communication disabilities to participate more fully in their social roles including interpersonal interaction, learning, education, community activities, employment, volunteerism, and care management.

iChat's communication software is the result of years of clinical research. Providing individuals with cognitive disabilities powerful, symbol-based communication resources, iChat allows for quick and easy self-expression.

### Why is this device for me?

If you are a person with a communication disability and fairly good motor control, this product may be for you. It is a small lightweight device with an incredibly crisp and bright display. The device can be transported and used anywhere – in a car, on an airplane, at a store, and at the dining table.

### Fast and Easy Communication

Compose and deliver messages quickly with straightforward PCS<sup>®</sup> symbols representing words, phrases and complete sentences. Built-in hardware buttons can be programmed to meet an individual's unique needs or to provide shortcuts for common functions.

### Ready to Run

Multiple pre-programmed page sets designed by speech-language pathologists with decades of AAC experience allow the user to communicate immediately. These ready-to-go page sets also reduce the need to create custom pages - which can also be quickly created for any occasion. This new device also includes 7 new page templates with buttons of different sizes on the same page.

Preprogrammed Page Sets – each containing many pages of content - includes this list and more!

12 Button Adult	Behavior Modification
Adult Conversation	Medical
12 Button Teen	more...
Preschool	

### Support When You Need It

All iChat customers have access to DynaVox Technologies' full-range of support services, including:

Professional Funding Assistance – Your dedicated Funding Coordinator will assist you throughout the process of funding your iChat through Medicare, Medicaid and/or private insurance.

DynaCare – DynaVox Technologies' comprehensive DynaCare Certified Unlimited Guarantee protects your new iChat for one year from the date of purchase.

Technical Support – Should you have questions about the operation of your iChat, the AAC industry's largest and most experienced technical support team is just a phone call away at 1-866-DYNAVOX. Find the answers you need at any time of the day or night just by visiting our 24/7 Knowledge Base at [www.dynavoxtech.com](http://www.dynavoxtech.com).

iChat <sup>3</sup> – Standard	800162
iChat <sup>3</sup> – Dedicated	800163

## Will Medicare cover Impact? YES!

The current Medicare coverage rules indicate that computer-based communication devices can not be covered unless access to all non-communication functionality has been blocked. For this reason, we have "dedicated device" versions of our communication aids.

## POPULAR ACCESSORIES

Velocity Language Application Program	600447
User Accessible Carrying Case	501247
Additional AC Charger Adapter	200397
