

# SpringBoard™ Plus

## NEW Features & Capabilities

- PRC Application and Support Software (PASS) allows user to create, modify, and save vocabularies and create support materials. AAC support professionals can also modify device contents from their PC.
- New "Set-up" key simplifies and speeds programming changes.
- Built-in player allows user to import WAV files and play MP3 files in stereo.
- USB flash memory port and Secure Digital card slot enable faster, easier memory backup and transfer options.
- Bilingual Spanish/English version features a unique vocabulary program that allows user to switch between languages at the touch of a button.
- Enhanced audio recording and speech output quality enables user to "speak up" clearly in noisy classroom or social settings.
- New pre-loaded adult male and female voices.
- Infrared environmental control functions to control common IR devices (such as lights and TV/DVD players).
- Basic computer emulation functions.
- Optional IntelliTools® Classroom Suite bundle.

*SpringBoard™ is an excellent starting point for the child or adult just beginning augmentative communication ... or the next step for those demonstrating success with manual boards or devices with limited message capacity.*

## Versatile and Easy to Implement

Even a person new to AAC can begin communicating in a matter of minutes with SpringBoard. No other digitized speech option provides the flexibility of communication and ease of customization and support that SpringBoard delivers.

### Vocabulary

- Five integrated versions of pre-stored vocabulary using 4-, 8-, 15-, and 32-location options with a special emphasis on those core words that power most speech.
- Pre-stored Activity Row categories and vocabulary plus Pages with expanded word sets.

- Six User Areas for creating transitional vocabularies, storing vocabularies for multiple individuals on one device, or creating and storing multiple assessment and training protocols.

### Keyboard Configurations

- Key sizes and location options range from basic 4-key up to 32-key displays.

## Access Methods

Schools and AAC centers will find the ease of changing access options makes SpringBoard a valuable training and assessment device.

- Direct selection
- Single- and dual-switch scanning
- Joystick
- Tracker Integrated Headpointing option
- 8-, 15-, and 32-location clear keyguards to aid direct selection (plus custom keyguard options)
- USB connectivity for use with headpointing systems, mouse, and mouse emulation access products requiring USB.
- Basic serial output to allow some computer access options.
- Infrared capability to control toys, TVs, CD players, and other infrared-accessed devices.

## Standard Features

- Introductory set of therapy exercises.
- "Exploration Wizard" for exploring targeting, picture recognition, associations, and vocabulary options.
- "Quick Start" print guide that highlights the device's key operations.
- PRC's Language Activity Monitoring (LAM) software enables clinicians to monitor communication progress through the recording of each language "event."

## Exclusive to SpringBoard

- Bilingual Spanish/English version.
- Compact, lightweight design that makes device portable for even a young child.
- Scalability — SpringBoard is uniquely designed to grow with the individual's communication needs.
- Access to over 3,000 Minspeak® icons in the device for customizing vocabulary.
- Over 5,000 optional PCS symbols for core vocabulary, Activity Rows, and Pages.
- Ability to save and transfer vocabulary into a Vantage or Vanguard device as skills expand.
- Simple formats for importing icons or digital photographs to personalize the device.
- Simple formats for creating Activity Rows and Pages for specialized vocabulary.
