

LIGHTWRITER®

TOBY!CHURCHILL

SL87 and SL88

Combining the power of direct selection with scanning capabilities in one portable device, the Lightwriter SL87 and SL88 provide effective tools that allows individuals with literacy skills and a range of physical abilities to speak their minds!

Extremely easy to understand and use, **Lightwriter's scan-system design** allows you to select from a variety of keyboards, including ABC, QWERTY and EARDU. The fully adjustable scan speed provides the scanning movement necessary to fit the individual's needs. Single switch and two switch scanning options are included with the SL87 and SL88.

Keep the conversations moving! Word prediction, abbreviation expansion, memories and expanded word prediction capabilities reduce the number of keystrokes or hits needed to compose a message and speed communication.

Highly intelligible voices ensure that messages are received and understood by communication partners. Lightwriter SL87 features nine popular DECtalk® voices: four male, four female and one child. **Natural sounding, high-quality Acapela HQ voices (one male and one female) are featured on the Lightwriter SL88.**

The **distinctive dual display** encourages interaction by positioning communication partners in a natural position for face-to-face communication and allows messages to be received even in noisy situations.

Built-in alarms allow you to quickly and easily get others' attention. Seven pre-set attention alarms to permit individual alarm sounds when multiple Lightwriter users are working in the same area.

Ready to go at a moments notice. Just press the power button and say what's on your mind! The rechargeable battery provides all the power you need for a full day of conversation. Lightwriter's "instant on" feature eliminates the wait that occurs when most computer-based AAC devices are powered on.

Designed to meet a range of exceptional needs. Enlarged text is available for direct selectors. Display four lines of small text, two lines of medium text or one line of large text.

The unique LightTouch keyboard is moisture-resistant and makes it easy for those with weak and declining muscle tone to communicate effectively using direct selection. Inadvertent keystrokes can be avoided using the adjustable tremor control. Audible feedback is provided for every keystroke.

Lightwriter SL87 and SL88 also support Morse Code via external switches, one-switch auto scanning and two-switch step scanning. Scanning with the Lightwriter is so straightforward and intuitive that no training is required.

You will **rest easy** knowing that the DynaCare Certified Unlimited Guarantee™ covers your Lightwriter for one year from the date of shipment.
