

LinkCLASSIC™

AAC Device

ATI's LinkCLASSIC is an easy-to-use, full-sized keyboard and Augmentative and Alternative Communication (AAC) device that speaks as you type. It allows you to save key phrases so you can retrieve and speak instantly. LinkCLASSIC is appropriate for individuals who have suffered from a stroke, or traumatic brain injury, or have acquired ALS or other speech disorders.

OVERVIEW

Just turn it on and start to type. LinkCLASSIC speaks exactly what you type, either immediately or when you choose to speak it, and automatically saves your text.

LinkCLASSIC has all the features of ATI's classic LINK™ device and more! It offers a larger display window than the original Link, plus a built-in telephone and 6 different languages.

LinkCLASSIC offers DECTalk speech output with 9 different voices: 4 male, 4 female and 1 child. Choice of 6 language options: US English, UK English, Latin-American Spanish, Castilian Spanish, French and German.

When you switch to either Spanish language, Spanish characters (Ñ, ñ, €) are instantly available to complement your Spanish speech readback.

For a type-and-talk keyboard with switch scanning and word prediction, read about our LinkPLUS model.

LinkCLASSIC FEATURES

- Synthesized DECTalk™ speech output
- Rechargeable internal batteries
- Adjustable legs—lay unit flat on surface or tilt slightly to adjust keyboard and display for comfort
- Adjustable settings—volume, rate and pitch
- Flexible readback options—by letter, word, sentence and shortcuts
- Pronunciation exceptions—enter phonetic spellings as needed
- Keyboard—standard, full-sized keyboard with 80 keys
- Two keyboard layouts—QWERTY and Alphabetical
- Sticky keys, key repeat and key delay
- Abbreviation expansion—create “shortcuts” for quick typed or spoken messages
- Transfer stored files to a Macintosh® or Windows® computer to format or print, or copy text files to LinkCLASSIC.
