- Optional *IntelliTools® Classroom Suite* bundle.
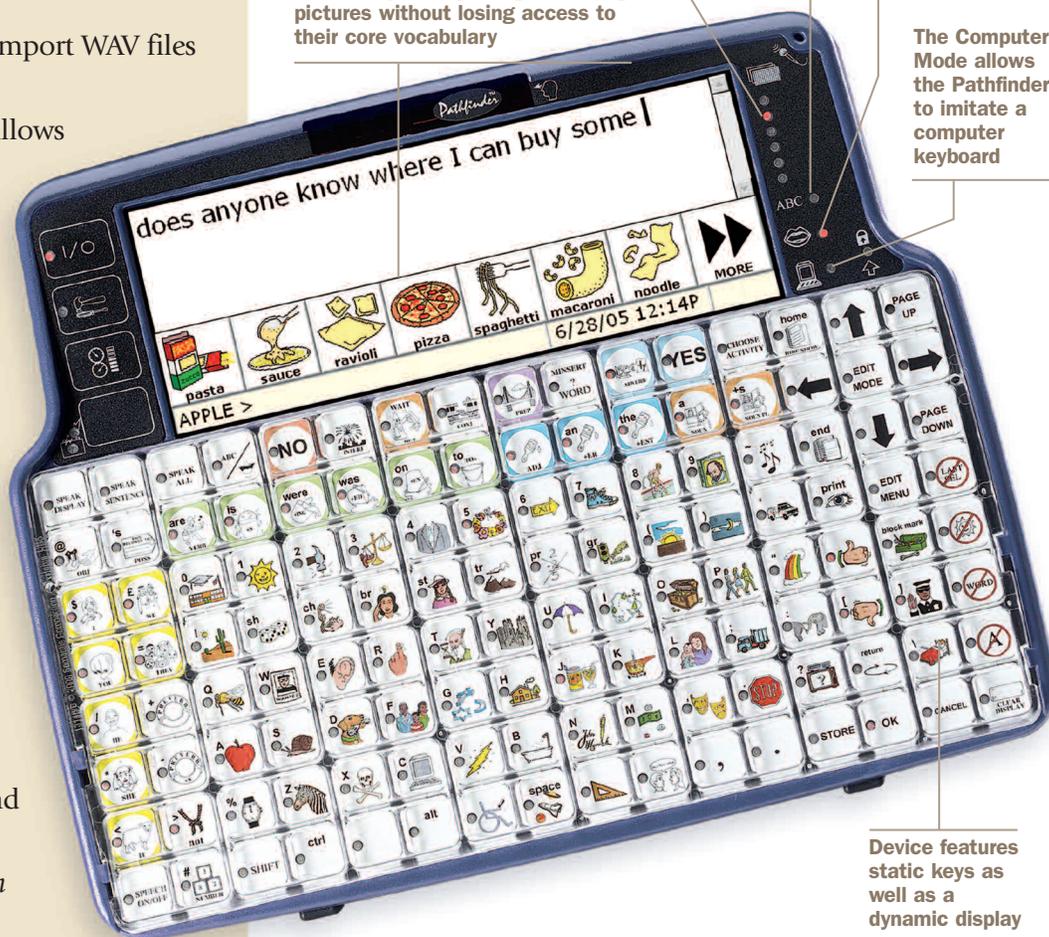

Six User Areas allow device to be set up with a wide variety of access options and vocabularies

Use the Spell Mode for spelling desired words, phrases, and sentences

The Activity Row gives users the option of locating extended vocabulary through single-meaning pictures without losing access to their core vocabulary

Use the Speech Mode when you want to use Minspeak to communicate

The Computer Mode allows the Pathfinder to imitate a computer keyboard

Device features static keys as well as a dynamic display

With its unique combination of a static keyboard, touch-screen dynamic display, and powerful Unity® 128 vocabulary program, Pathfinder™ remains the communication aid of choice for the most successful augmented communicators.

Unlimited Capabilities, Unlimited Communication

Vocabulary

- Unity® 128 for Pathfinder: Pathfinder includes the powerful Unity 128 language program. You can choose from several integrated versions of Unity 128, from simple starter vocabulary to the full Unity program with over 4,000 words already programmed into the device. Unity 128 grows with the communication needs of the user with no re-learning required.

- Unity 32 includes two integrated versions: The first version includes primarily "Single-Hit" words to provide a very simple introduction to the vocabulary. The "Sequenced" version provides access to an expanded vocabulary by sequencing the icons. Any individual with visual or motor impairments may find the larger graphics and larger keys in the Unity 32 program easier to access than the 128 version. This program might be considered as a starting point for very young augmented communicators and for individuals with moderate to severe cognitive challenges. Utilizing Unity language software, a user can transition to the 128 version without having to relearn a vocabulary system.

- Adult Vocabulary Programs: Two popular vocabulary programs for literate users, AQLS and WordPower, are available for Pathfinder. Purchase separately or as a product option.
