Vanguard Plus speaks Spanish with New Bilingual Option!

**Overview**

Vanguard Plus is a full-sized, dynamic display communication device featuring synthesized and digitized speech, computer emulation, and infrared environmental controls.

Vanguard has a striking 12.1" touch screen display with adjustable backlighting. The large, full-color display can aid clients with visual or motor issues or clients using scanning as their access method. Vanguard’s integrated headpointing system utilizes Madentec's Tracker One technology.

The Vantage Lite and Vanguard Plus have the same operating systems, features, and capabilities. Choose Vanguard for a larger screen; Vantage Lite for portability.

**Features**

- "Exploration Wizard" for exploring targeting, picture recognition, associations, and vocabulary options.
- Built-in media player for playing MP3, WMA, and WAV files in stereo
- Built-in computer access and environmental controls.
- IR capabilities and environmental controls
- Notebook capability for creating or storing text.
- Presets to support implementation of LAMP therapy strategies
- Special vocabulary sets for adults with acquired language disorders.
- Spelling and Word Prediction software.
- PRC Application and Support Software (PASS™)
- Setup key enables instant programming
- Access methods include, direct selection; single- or dual-switch scanning; USB and serial ports to accommodate other external headpointing solutions.

**Voices**

- Acapela Text-to-Speech
- Fonix-DECTalk Text-to-Speech software
- RealSpeak Text-to-Speech
  - Click here for a Male voice sample
  - Click here for a Female voice sample

**Specifications**
